

## Health-ISAC Summit, Netherlands An In-Person Success!

The second Health-ISAC European Summit was a great success! Held at the historic yet thoroughly modern Duin & Kruidberg Estates, attendees discussed current trends of healthcare security and innovative ways to maintain resilience. The discussion was robust and engaging and the group enjoyed the many networking opportunities the event offered.

A few speaker highlights include the Law Panel, Keynote Mikko Hypponen, who explained how a cyber arms race is currently in motion. A security panel from Prague spoke on current trends in cybersecurity. Summit sponsors Mastercard offered compelling data on third party risk in the Healthcare sector, while Intel471 took attendees on a deep dive into ransomware. Several members shared their unique use case scenarios and there is already buzz about the next Summit. Thank you to everyone who connected in Santpoort-Noord.

## Time is Running Out...Book your hotel by November 5th for the Fall Americas Summit! San Diego, Nov 30—Dec 2, 2021

The S.S. H-ISAC is preparing to set sail for its 3-day tour to Intelligence Island. The island crew has been hard at work to ensure all castaways will be comfortable on this tropical island. An abundance of intelligence has washed up on the shore, so get ready for over 1800 minutes of informative sessions and more than 1200 minutes of networking opportunities with a growing amount of attendees—250+ and counting! The Summit platform goes live November 8.

Register here: <https://h-isac.org/summits/intelligence-island-fall-2021-summit/>

Catch up on vintage Gilligan's Island episodes on an outdoor screen with games on the beach. Dine with Orcas at Sea World. Summit emcee will be Emmy award winning consumer technology expert, Katie Linendall <https://katielinendoll.com/about>.

H-ISAC is pleased to publish a monthly member newsletter. It is designed to bring events and other important ISAC information to your attention. If there is something you would like to see included please email: [contact@h-isac.org](mailto:contact@h-isac.org)

# Health-ISAC APAC Summit 22-24 March 2022 in Singapore Call for Papers opens 10 November!

Submit papers here: <https://h-isac.org/events/>

Anticipation for this inaugural Summit has been building since before the pandemic. Mark your calendar to join us in Singapore this spring.

Join the content committee to help shape an informative agenda.

Interested members, please email  
[Contact@h-isac.org](mailto:Contact@h-isac.org)

## THREAT OPERATIONS CENTER

### ACTIONABLE THREAT INTELLIGENCE

The Health-ISAC Threat Operations Center (TOC) works in coordination with the Health-ISAC Threat Intelligence Committee (TIC) to produce actionable threat intelligence. Observances noted by a TIC member are first investigated and corroborated by TOC intelligence analysts, reviewed by all TIC members, and then shared with Health-ISAC membership at large. These reports include recommendations and mitigation strategies and have been disseminated, in some cases, less than 24 hours after the initial observances of the threat. This timely generation of intelligence occurs in hope that such coordination can have a meaningful impact on the Health-ISAC membership and the overall security of the global healthcare sector. Members interested in being part of the TIC, please email [Contact@h-isac.org](mailto:Contact@h-isac.org)

## WORKING GROUP

### Attend the “CAT” WG Open Meeting!

December 8, 2021 – 10:00-11:00 am ET

The Cybersecurity Awareness and Training Working Group (CAT WG) is a confidential forum of Cybersecurity leaders and professionals from Health-ISAC member organizations focused on the education, development and knowledge-sharing of cybersecurity awareness and training materials and best practices.

In lieu of a roundtable at this year's Fall Summit, join us for a discussion with opportunities to ask questions and share ideas!

Interested? Email us here: [Contact@h-isac.org](mailto:Contact@h-isac.org)

## COMMUNITY SERVICES

### API Security Risk Assessment from Salt

We're excited to introduce our newest community leader, Salt Security. Salt provides API security across the full API lifecycle, with continuous discovery, attack prevention, and remediation.

Salt Security protects the APIs at the core of modern healthcare applications, using machine learning and AI to automatically and continuously identify and protect APIs. Deployed in minutes, it learns the granular behavior of APIs and requires no configuration or customization to pinpoint and block API attackers.

SALT is offering H-ISAC Members a no-cost API security risk assessment, and any member who purchases the SALT solution will receive three free months of API protection. Learn more here: <https://h-isac.org/community-services/>.
