Collective Security

2024 Health-ISAC APAC Summit

March 19-21, 2024
Cape Schanck
Melbourne, Australia

Health-ISAC is Excited to Announce the APAC Keynote!

Alastair MacGibbon, Australia's foremost cybersecurity leader and Chief Strategy Officer at CyberCX, keynotes next month's APAC Summit near Melbourne, Australia.

MacGibbon will share his expertise with attendees from his 15-year career as a Federal Agent in the Federal Police, where he established Australia's High Tech Crime Centre, he held senior cyber security and safety roles across the private sector. Upon returning to public service, Alastair was appointed Australia's

inaugural eSafety Commissioner before becoming National Cyber Security Adviser, head of the Australian Cyber Security Centre and Special Adviser to the Prime Minister on Cyber Security.

Looking to make the most out of your trip?

Sign-up for a Special Excursion on Friday After the Summit for only \$199!

We will start the excursion by wandering through a stunning bushland setting with an expert ranger who will share stories of unique and unusual native wildlife. You will get up close to the most iconic Australian species, the kangaroo and koala, in an exclusive small group experience with plenty of opportunities to grab the perfect photo.

Next, we will take our taste buds on a road trip to sniff, sample, and sip classic Yarra Valley wines at Rochford Wines. Here, we will indulge our senses as we enjoy wine tasting along with a scintillating lunch while sampling the grapes and marveling at the harmony of diverse soils, temperate weather, and the dedication of generations of vignetter's in this pioneering region that kick-started Victoria's wine industry all the way back in 1838.

Annual Threat Report

Now Available!

Health-ISAC's Annual Threat Landscape Report

This year's Threat Report added Medical Device Security, OT threats, Physical Security and included AI as an emerging new threat vector. With inputs from nearly 400 health security professional, the results reveal top threats and concerns. Members can access the report in the Threat Intelligence Portal (HTIP)

MID-FEBRUARY - Public and Members should look for the summary of the threat report in a version earmarked exclusively for CISOs, along with a market trend report on cybersecurity products and services.
