Over 550 security champions from 10 countries, almost half of which were first-time attendees, gathered in Florida at Health-ISAC's Spring Americas Summit. Members met in working groups and Round Tables to work on shared challenges and collaborate on best practices. They also attended 44 presentations across 4 tracks.

Routhy Award Winner Announced!

Health-ISAC presented Erik Decker, VP and CISO at Intermountain Health, with the 2024 Routhy Award in recognition of his contributions to the health sector.

PHYSICAL SECURITY

The Active Shooter/Hostile Event Response (ASHER) Attacks in Health Services workshop series culminated at the Summit. Members can look for insights from the after-action report in late July, followed by a public blog in August for the health sector.

Breaking the Barriers in Information Sharing - June 18 in Washington, DC

Health-ISAC, the Center for Cybersecurity Policy and Law, the National Council of ISACs, and the Cyber Threat Alliance are holding a *Breaking Down Barriers in Information Sharing* event on June 18 from 1:00 p.m. ET to 4:30 p.m. ET with a networking reception to follow at the offices of Venable LLP in Washington, D.C.

Developed with leadership, legal counsel, and compliance professionals in mind, *Breaking Down Barriers in Information Sharing* is part of a larger initiative to better understand the current state of information sharing and to create a framework to enable effective cybersecurity information sharing given the cost, compliance, and liability concerns associated with such sharing. The event will include panel discussions and an in-person-only workshop session held under Chatham House Rules and will inform both a white paper and follow-on activities that will set the stage for additional dialogue between public and private sector stakeholders. For more information, email contact@h-isac.org.

NEW WHITE PAPER: PASSWORDLESS

Health-ISAC released a new white paper to help CISOs understand passwordless technologies and how they can be used to authenticate patients and healthcare providers at scale in healthcare. Access this and others [here](#).
