

Health-ISAC Announces Keynote Speaker for the European Summit!

Attendees at the upcoming European Summit in Rome will have the opportunity to hear a keynote address from Flavio Aggio.

As Chief Information Security Officer (CISO), Flavio is responsible for Information Security and Cybersecurity at the World Health Organization* (WHO).

Prior to joining WHO, Flavio was the Chief Technology Officer at the City and County of San Francisco, where he developed technology solutions to modernize and protect the city. Before that, he held technical leadership positions in Enterprise Architecture, Project Management, Telecommunications, and IT operations with Unisys, ASML, Dow Chemical, and Rohm & Haas.

Flavio Aggio

Secure your spot today and prepare to enjoy an exceptional evening excursion in the heart of Italy's capital, connect with history, and enjoy a private dinner on a panoramic terrace offering breathtaking views over the city of Rome. Register [here](#).

HEALTH-ISAC IN AUSTRALIA

Melbourne, Australia

**"Really interesting speakers- a good range of difficult topics covered to suit all attendees."
-Workshop Attendee**

Health-ISAC recently held a workshop in Australia in June, hosted by the Victoria Department of Health.

Over 40 people participated in robust conversations around several top-of-mind security topics as well as engaged in a tabletop exercise. Attendees heard the latest health sector threat landscape updates, received tips on navigating geopolitical tensions affecting the sector, and learned about building a cyber-resilient hospital.

Health-ISAC is pleased to publish a monthly newsletter designed to bring events and other important ISAC news to your attention. If there is something you would like to see included, please email: contact@h-isac.org

Mark your calendars for August 11th.
Registration opens with a One-Day \$99 Sale
exclusively for Members.

Call for Participation: Electronic Prescription Fraud Working Group

The eRX Fraud working group will work with Health-ISAC to create an information sharing utility for the health sector that can be used to detect and prevent eRX fraud and to create a forum for eRX professionals to collaborate and contribute eRX fraud intelligence.

The eRX working group is open to individuals involved in the detection, prevention or response of Electronic Prescription (eRX) fraud. If you are interested in actively participating in and contributing to this new working group, please email membership@h-isac.org with your job title and role description.
