European Summit Registration Opens August 15!

Cast your Security Net to catch a boatload of networking and learning opportunities with Health-ISAC in Algarve, Portugal Oct 18-20, 2022 at the beautiful Hilton Vilamoura as Cascatas Resort & Spa. This southernmost region of Portugal is known for its gorgeous beaches, whitewashed fishing villages and historical castles, churches and ruins.

Exclusive Evening Event

Faro

Catamaran

Private Island Dinner

Create lasting networking relationships with peers exploring historical Faro, the capital of Algarve. Then board a catamaran and sail past the world famous Ria Formosa - considered one of the seven natural wonders of Portugal, to a private island for dinner exclusive to Health-ISAC European Summit attendees. This is an event you don't want to miss!

Fall Americas Registration opens August 29!

Start mapping out your Route to Security Dec 6-8 in Phoenix, AZ. This is an exit not to be missed - famous for its renowned sessions and networking opportunities. Here is some feedback from previous attendees:

"Excellent, relevant content. Great networking opportunities, learning from others, sharing information." – Spring 2022 Summit Attendee

"A very unique conference, not too big, just the right size to really collaborate and meet others in the healthcare security community."
– Spring 2022 Summit Attendee

Register early and save \$\$

Summitpalooza \$99 for one day only! ****August 29****

Book your hotel right away. The Spring Americas Summit hotel room block sold out early. The link to book your hotel will be included in your Summit registration confirmation email.

MEDICAL DEVICE SECURITY

On this episode of the The Internet of Threats podcast, Health-ISAC’s Errol Weiss (Chief Security Officer) and Phil Englert (Director of Medical Device Security) join podcast host Eric Greenwald to discuss the rising stakes of medical device cybersecurity, the growing role of government in regulating cybersecurity controls in healthcare, and how Health-ISAC fits into the picture.

Podcast link:

[Medical Device Security: Should I worry about my pacemaker being hacked?](#)

Topics discussed include: The government’s increased appetite for cybersecurity regulation (with a focus on medical device security); How to protect against attacks with tens of thousands of different medical devices made by a wide array of different manufacturers and that do different things;

The importance of having visibility into the components that make up those thousands of medical devices;

Whether the SBOM (Software Bill of Materials) is ready to be a key control in the healthcare cybersecurity ecosystem.

Successful Public-Private Hobby Exercise

Last week in Washington, DC, participants representing public and private Healthcare and Public Health sector organizations discussed significant security and resilience challenges. The annual exercise included government keynote speakers, large group discussion, breakout room discussions, and ample networking opportunities.

WORKING GROUPS

By Members / For Members

Leveraging Health-ISAC’s community to address specific shared challenges, working groups serve as discussion forums to lead and drive solutions for the industry. Working groups create products such as re-usable templates, policies, whitepapers and best practices. Working group participants also often co-present at Health-ISAC Summits. Any member is welcome to join a Working Group!

NEW AMBASSADOR - GOOGLE CLOUD

Building A Resilient Healthcare Ecosystem With Health-ISAC

As part of Google’s investment initiative to advance cybersecurity in critical infrastructure, Google Cloud will bring experts and resources to the healthcare community and its leadership through Health-ISAC’s [Ambassador program](#).

“Partnering with Health-ISAC just makes sense. We share a common vision that building a safe and reliable health ecosystem is our collective responsibility and keeps with values of respecting and protecting each other. This partnership should inspire other organizations with skills and capabilities that can contribute to these outcomes to join us,” said Phil Venables, CISO, Google Cloud.
