*"I never realized there were so many other European healthcare analysts like me." - European Summit Attendee*

## Inaugural European Summit is in the books—and more to come!

Last month, 105 attendees from 15 different countries - including a few supportive vendors - met at a hotel in Zurich, Switzerland for two days of solid security content and beneficial health IT networking.

A solid foundation was laid for future regional events through the active information sharing that took place at H-ISAC's European Summit. The mission of H-ISAC was accomplished. Attendees were able to network with each other and meet new faces and names that they can continue to collaborate with on Threat Intel sharing. These relationships allow members to be more proactive in creating greater cyber resilience for their own enterprises and communities.

Note: If you are an H-ISAC member based in Europe, please email [contact@h-isac.org](mailto:contact@h-isac.org) to get added to the collaboration forums and get involved in the community.
